1. Overview of RCH Portal: An Initiative of the National Health Mission

The **Reproductive and Child Health (RCH)** Portal, developed by the Ministry of Health & Family Welfare, Government of India, is a key component of the **National Health Mission (NHM)**, focused on reducing infant and maternal mortality rates while ensuring quality healthcare services for pregnant women and children across the nation. This integrated system is designed to enable evidence-based decision making by systematically capturing and managing data related to maternal and child health.

The RCH Portal, an enhanced version of the **Mother and Child Tracking System (MCTS)**, provides a name-based tracking mechanism for beneficiaries throughout their reproductive lifecycle. It facilitates the timely delivery of essential antenatal, postnatal, and childbirth services and tracks immunization schedules for children to ensure complete coverage. Additionally, the portal supports the implementation of the **RMNCH (Reproductive, Maternal, Newborn, and Child Health)** program, offering comprehensive family planning services, quality antenatal care, and automated alerts for **Auxiliary Nurse Midwives (ANMs)**, beneficiaries, and health managers. Years of research have demonstrated that small and cost-effective interventions can significantly reduce maternal health risks. Many maternal deaths can be prevented by ensuring access to appropriate healthcare during pregnancy, childbirth, and the postnatal period. The RCH Portal is a step towards making such essential health services accessible and efficient across the country.

2. Introduction: RCH 2.0

The RCH 2.0 application will be a comprehensive digital platform that integrates various modules for managing beneficiary data, health professional records, health facility records, services provided to beneficiaries and other related information. The primary goal is to streamline the processes involved in maternal and child health services, making it easier for healthcare providers and administrators to deliver quality care.

RCH 2.0 - Objectives

- **Enhanced User Experience:** Improving the user interface to make it more intuitive and user-friendly, ensuring that users can easily navigate and access the information they need.
- **Robust Data Management:** Ensuring the integrity and security of the vast amounts of data related to beneficiaries, ANMs (Auxiliary Nurse Midwives), ASHA (Accredited Social Health Activists), and health professionals, internally and externally.
- **Scalability and Performance:** Designing the system to handle many users, beneficiaries, and data transactions efficiently, ensuring the application remains responsive and reliable.
- **Leveraging Modern Technologies:** Incorporating modern web technologies, services, and frameworks to build a more maintainable and scalable application.

3. Overview of this document

This guide provides information on how to Add Services to ANC

4. Add Pregnancy Services & Child Registration

The process diagram below outlines the complete steps to Add Services like Delivery Preparedness, Delivery Details & Outcome as well as Child Registration.

Each box is clickable and links directly to the relevant section within this document.

5. RCH Portal Home Page

Navigational Instruction

Click any box on the process map to quickly navigate to the related section.

From the RCH homepage begin by **Login/Signup***

Note:

* A detailed user guide/SOP is available that explains the login process. Please refer to that document for step-by-step instructions on how to log in.

6. Dashboard

Navigational Instruction

Click any box on the process map to quickly navigate to the related section.

1

STEP 1: From the Landing Page click on the '**Beneficiaries**' button

7. Beneficiaries

Navigational Instruction

Click any box on the process map to quickly navigate to the related section.

This is an overview of the Beneficiaries page.

The screenshot shows the 'Beneficiaries' page with the following components:

- A**: Left menu with 'Beneficiaries' selected.
- B**: Search bar with placeholder text 'Search by Name, Mobile Number, ABHA ID'.
- C**: Filters section with dropdowns for 'Name', 'Beneficiary Gender', and 'Beneficiary Type'.
- D**: Settings icon (gear) in the top right corner.
- E**: List of all beneficiaries table.

Table Data:

Name	Beneficiary Gender	Beneficiary Type	ABHA ID	Mobile Number	Action
Mohd. Kamil	Male	Male	91212846486604	9873459939	
Rakesh	Male	Male		9818078724	
Nikhil Kumar Agarwal	Male	Male	91684073025323	9718020448	
Usha Singh	Female	Woman	91502078660581	8709853158	
kuntala	Female	Woman		9937694041	
Diksha Rushikesh Ku...	Female	Woman	91623238137748	9112214661

Jagatjit Singh					

Settings Modal (D):

Select Parameters to View

- ☒ Name
- ☒ Beneficiary Gender
- ☒ Beneficiary Type
- ☐ ABHA ID
- ☐ Mobile Number

Annotation Text:

This takes you to the Beneficiaries page

You'll see a grid listing all the beneficiaries in the database.

A Left Menu

B Search

Above the grid, you'll find a search field. Health providers can search for beneficiaries using minimum 3 keyword of Name, Mobile Number or ABHA ID

C Filters

Users can input keywords here, not only selection dropdown. In the dropdown, users can select only one option at a time not options.

D Settings

On the right side of the page, click the settings icon to open a pop-up menu.

E List of all beneficiaries

Here, you'll find additional parameters that can be included or excluded from your **search** by **checking** or **unchecking** boxes beside each parameter name.
